

Professional, friendly, and passionate recent Bachelor of IT graduate from the ANU. An effective communicator, experienced leader and fast learner, I am eager to jumpstart my career in technology and to make an impact on the world. Using my experience in programming, project management, data science and design, I am confident that my impact can start with your organisation.

Education

Australian National University

Bachelor of Information Technology (Honours)
FEB 2017 - DEC 2020

Skills Summary

Technical and Industry Skills

Java	Python	C#	JavaScript
HTML/CSS	SQL	Git	Technical Report Writing
Agile	Kanban	User Evaluation Testing	Graphic Design

Communication

- **Excellent written communication skills** through extensive experience in research projects and marking assignments as a University Tutor.
- **Strong oral communication skills** through my experience working as a Club President, Student Ambassador, and Tutor which involve delivering information in a professional manner to people of different backgrounds and capabilities.

Teamwork

- **Can cooperate well** from my experience working in teams in university clubs, student projects and tutoring in which teamwork is critical for success.
- **Tolerant and accommodating** of people of different personalities and priorities, ensuring that the team conducive illustrated by my involvement in numerous culturally diverse teams.
- **Confident in my abilities to lead and delegate** when necessary obtained from time as President of the ANU Indonesian Students Association and Project Manager in Techlauncher.

Resilience

- **Can adapt to new difficulties** and maintain productivity in highly dynamic situations developed from my experiences in team sports, club president and university, all of which that involve hard deadlines and dynamic circumstances.
- **Quick and eager learner**, driven to alleviate shortcomings and ensuring that my skill set is appropriate for any given environment illustrated by my experience in tutoring in which course content needs to be understood on a weekly basis.

Relevant Experience

Vacation Scholar

– CSIRO, Black Mountain (2019 – 2020, 2020 - Current)

- Developed optimised and insightful visualisations of CSIRO pedigree data containing over 45,000 data entries into interactive graphs in 3D space
- Researched heavily into pre-existing technologies and approaches to graph visualisations
- Modularised software to function on multiple different hardware technologies including cutting-edge hardware such as the Hololens 2, Vive Pro, and Oculus Quest
- *C#, Unity, Microsoft Mixed Reality Toolkit, Git, Confluence*

Fenner Symposium

– Fenner Hall, Australian National University (2019)

- Utilised Mid-Year Survey Results data obtained from 2011 until present.
- Performed Data Cleaning and Integration on over ten datasets with more than 200 entries.
- Analysed data using data mining techniques such as Frequent Pattern Mining.
- Provided statistical evidence uncovering that a certain demographic was being less engaged, which fueled certain changes to the Hall.
- *Python, Jupyter Notebook, Excel, R, Rattle, Pandas, Scikit-learn*

Front-End Developer

– Techlauncher, Australian National University (2019)

- Developed an API Test Client for Xero Canberra using Agile Methodologies.
- Spearheaded the Iterative Design Process by creating mock-ups, performing User Evaluation Testing and documentation.
- Assisted the Front-End developers in translating design into a workable product using React.
- *JavaScript, React, Node.JS, Git*

Project Manager

– Techlauncher, Australian National University (2019 – Present)

- Working with clients from Accenture, lead and managed the development of a UI Prototype optimised for fatigued and high-risk workers
- Involved managing team in delivering research, UI prototypes and testing alongside communicating with stakeholders.
- *JavaScript, React, Git, Confluence,*

University Casual Academic

– Australian National University (2019 – Present)

- Tutored assembly programming and computer architecture (for COMP2300), Web Development and Design (for COMP1710) and Graphics (COMP1720).
- Taught and communicated to up to 60 students of different abilities and backgrounds.
- Collaborated closely with lecturer and other tutors in planning of course and marking.
- *ARM Assembly, HTML/CSS, JavaScript, p5.js, VSCode*

Hackathon Participant

– Govhack (2019)

- Utilised publicly provided data and created an innovative product that allowed people to determine job prospects and growth
- Developed a backend to process data using Flask and front-end using HTML, CSS and JavaScript.
- Shortlisted for both the Western Australia Awards and the International Awards.
- *HTML/CSS, JavaScript, p5.js, Git, Python, Flask*
